DETAILED ACTION

Allowable Subject Matter

Claims 1-10 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record (i.e. Hamabe et al.) teaches the conventional method for closed loop forward link transmission power control comprising measurement by the mobile station of the reception quality or signal to noise ratio (SIR) of the forward link, comparison of the reception quality with a control target quality or SIR and transmission of the comparison result as a forward control command to indicate to the base station a decrement or increment of the forward transmission power. The prior art made of record fails to teach a power control method comprised of equalizing the measured SIRs of a plurality of physical channels and ensuring the new average SIR for the plurality of physical channels is substantially the same as the first average SIR of the plurality of measured channel SIRs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Osaki (US 6,148,216), Hwang et al. (US 2002/0196766) and Hamabe et al. (US 2002/0055367).
